About IHTECC

The number, diversity and competitiveness of Iran's Technology-based Firms (TBFs) is soaring remarkably. Although many of these firms' focus is merely the domestic market, a significant number of them have already entered or on their way to enter the global markets impatiently.

Iran Hi-Tech Export Companies Club (IHTECC) has developed its own model for export readiness assessment (ERA) and already applied it on Iranian technology-based enterprises for the purpose of supporting them to introduce their products, capabilities and experiences to the global markets.
