

ANNEX 22-11

Introductory notes and list of working or processing required to be carried out on non-originating materials in order that the product manufactured can obtain originating status

PART I

INTRODUCTORY NOTES

Note 1:

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 61.

Note 2:

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonized System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns, a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonized System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 is to be applied.

Note 3:

- 3.1. The provisions of Article 61, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in the beneficiary country or territory or in the Union.

Example:

An engine of heading 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading ex 7224.

If this forging has been forged in the beneficiary country or territory from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in the beneficiary country or territory. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.

- 3.3. Without prejudice to Note 3.2, where a rule uses the expression 'Manufacture from materials of any heading', then materials of any heading(s) (even materials of the same description and heading as the product) may be used, subject, however, to any specific limitations which may also be contained in the rule.

However, the expression 'Manufacture from materials of any heading, including other materials of heading ...' or 'Manufacture from materials of any heading, including other materials of the same heading as the product' means that materials of any heading(s) may be used, except those of the same description as the product as given in column 2 of the list.

- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth – even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn – that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4:

- 4.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.

- 4.2. The term 'natural fibres' includes horsehair of heading 0503, silk of headings 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203, and other vegetable fibres of headings 5301 to 5305.
- 4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

Note 5:

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4).
- 5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus Agave,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,

- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of poly(phenylene sulphide),
- synthetic man-made staple fibres of poly(vinyl chloride),
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,
- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading 5605.

Example:

A yarn, of heading 5205, made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used, provided that their total weight does not exceed 10 % of the weight of the yarn.

Example:

A woollen fabric, of heading 5112, made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used, provided that their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading 5802, made from cotton yarn of heading 5205 and cotton fabric of heading 5210, is a only mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating 'yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped', this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating 'strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film', this tolerance is 30 % in respect of this strip.

Note 6:

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7:

- 7.1. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation process ⁽¹⁾;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation.

- 7.2. For the purposes of headings 2710, 2711 and 2712, the 'specific processes' are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation process ⁽¹⁾;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;

⁽¹⁾ Additional note 5(b) to Chapter 27 of the Combined Nomenclature.

- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) in respect of heavy oils of heading ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);
- (l) in respect of products of heading 2710 only, deparaffining by a process other than filtering;
- (m) in respect of heavy oils of heading ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
- (n) in respect of fuel oils of heading ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
- (o) in respect of heavy oils other than gas oils and fuel oils of heading ex 2710 only, treatment by means of a high-frequency electrical brush discharge;
- (p) in respect of crude products (other than petroleum jelly, ozokerite, lignite wax or peat wax, paraffin wax containing by weight less than 0,75 % of oil) of heading ex 2712 only, de-oiling by fractional crystallisation.

7.3. For the purposes of headings ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water separation, filtering, colouring, marking, obtaining a sulphur content as a result of mixing products with different sulphur contents, or any combination of these operations or like operations, do not confer origin.

Special provisions concerning equivalent goods

I. CUSTOMS WAREHOUSING, INWARD AND OUTWARD PROCESSING

Conventionally produced goods and organic goods

It is not permitted to replace:

- organic goods by conventionally produced goods; and
- conventionally produced goods by organic goods.

II. INWARD PROCESSING

(1) Rice

Rice classified under CN code 1006 shall not be deemed equivalent unless it falls within the same eight-digit CN code of the Combined Nomenclature. Nevertheless, for rice with a length not exceeding 6,0 mm and a length/width ratio equal to or more than 3 and for rice with a length equal to or less than 5,2 mm and a length/width ratio equal to or more than 2, equivalence shall be established by determination of the length/width ratio only. The measurement of the grains shall be done in accordance with Annex A(2)(d) to Regulation (EC) No 3072/95 on the common organisation of the market in rice.

(2) Wheat

Equivalent goods may be used only between wheat harvested in a third country and already released for free circulation and non-Union wheat, of the same eight-digit CN code, having the same commercial quality and the same technical characteristics.

However:

- derogations from the ban on use of equivalent goods may be adopted in respect of wheat on the basis of a communication from the Commission to the Member States, after examination by the Committee,
- the use of equivalent goods is permitted between Union durum wheat and durum wheat of third-country origin, provided it is for the production of pasta falling within CN codes 1902 11 00 and 1902 19.

(3) Sugar

Recourse to the use of equivalent goods is permitted between non-Union raw cane sugar (CN codes 1701 13 90 and/or 1701 14 90) and sugar beet (CN code 1212 91 80) under the condition that processed products falling within CN code 1701 99 10 (white sugar) are obtained.

The equivalent quantity of raw cane sugar of standard quality as defined in point III of Part B of Annex III to Regulation (EU) No 1308/2013 shall be calculated by multiplying the quantity of white sugar with the coefficient 1,0869565.

The equivalent quantity of raw cane sugar not of standard quality shall be calculated by multiplying the quantity of white sugar with a coefficient obtained by dividing 100 by the yield of raw cane sugar. The yield of raw cane sugar shall be calculated as set out in point III of Part B of Annex III to Regulation (EU) No 1308/2013.

(4) Live animals and meat

Equivalent goods may not be used for inward-processing operations on live animals or meat.

Derogation from the ban on the use of equivalent goods can be made for meat which has been made subject of a communication by the Commission to the Member States, after an examination carried out by a body composed of representatives of the customs administrations of the Member States if the applicant can prove that equivalence is economically necessary and if the customs authorities transmit the draft of the procedures foreseen to control the operation.

(5) Maize

The use of equivalent goods between Union and non-Union maize is possible only in the following cases and subject to the following conditions:

- (1) In the case of maize for use in animal feed, the use of equivalent goods is possible provided that a customs control system is set up to ensure that the non-Union maize is in fact used for processing into animal feed.

- (a) between Union extra virgin olive oil falling within CN code 1509 10 90 which corresponds to the description in Point 1(a) of Part VIII of Annex VII to Regulation (EU) No 1308/2013 and non-Union extra virgin olive oil of the same CN code, provided that the processing operation produces extra virgin olive oil falling within the same CN code and satisfying the requirements of the said Point 1(a);
- (b) between Union virgin olive oil falling within CN code 1509 10 90 which corresponds to the description in Point 1(b) of the Part VIII of Annex VII to Regulation (EU) No 1308/2013 and non-Union virgin olive oil of the same CN code, provided that the processing operation produces virgin olive oil falling within the same CN code and satisfying the requirements of the said Point 1(b);
- (c) between Union lampante virgin olive oil falling within CN code 1509 10 10 which corresponds to the description in Point 1(c) of the Part VIII of Annex VII to Regulation (EU) No 1308/2013 and non-Union lampante virgin olive oil of the same CN code, provided that the processed product is:

- B. The blendings referred to in Point A.1(c) second indent and Point A.2, with non-Union virgin olive oil, used in an identical manner, are authorised only where the arrangements for supervision of the procedure are organized in a manner that makes it possible to identify the proportion of non-Union virgin olive oil in the total quantity of blended oil exported.
- C. The processed products must be put into immediate packaging of 220 litres or less. By way of derogation, in the case of agreed containers of 20 tonnes maximum, the customs authorities may allow the exportation of the oils found in the preceding Points on condition that there is systematic control of the quality and quantity of the exported product.
- D. Equivalence shall be checked by using commercial records to verify the quantity of oils used for blending and, for the purpose of verifying the quality concerned, by comparing the technical characteristics of samples of the non-Union oil taken when it was entered for the procedure with the technical characteristics of the samples of the Union oil used taken when the processed product concerned was processed against the technical characteristics of the samples taken at the time of actual exportation of the processed product at the point of exit. Samples shall be taken in accordance with international standards EN ISO 5555 (sampling) and EN ISO 661 (sending of samples to laboratories and preparation of samples for tests). The analysis shall be carried out with reference to the parameters in Annex I to Commission Regulation (EEC) No 2568/91 ⁽¹⁾.

(7) Milk and milk products

Recourse to the use of equivalence is permitted under the following conditions:

The weight of each component of milk dry matter, milk fat matter and milk protein of the import goods shall not exceed the weight of each of these components in the equivalent goods.

However, where the economic value of the goods to be placed under inward processing is determined by only one or two of the above mentioned components, the weight may be calculated on the basis of this or these component(s). The authorisation shall specify the details, notably the reference period for which the total weight has to be calculated. The reference period shall not exceed 4 months.

The weight of the relevant component(s) of the goods to be placed under inward processing and of the equivalent goods shall be indicated in the relevant customs declarations and INF, to enable the customs authorities to control the equivalence on the basis of those elements.

III. OUTWARD PROCESSING

The use of equivalent goods is not permitted for goods which are covered by Annex 71-02.

⁽¹⁾ OJ L 248, 5.9.1991, p. 1.
