Nature and Food Quality*

ADDITIONAL DECLARATIONS FRUITS AND VEGETABLES

These requirements apply from December 14, 2019

The European Union requires additional declarations on phytosanitary certificates to be issued for plants, plant products and other regulated articles imported into the EU. The additional declarations are mentioned in several official regulations, such as Commission Implementing Regulation (EU) 2019/2072

This document gives a complete and up-to-date enumeration of additional declarations that are required for the EU and in particular for the Netherlands, grouped per sector and per product.

ADDITIONAL DECLARATION FRUITS AND VEGETABLES

How to use these pages and annexes

- 1) For details on 'Plants for planting', check the document "Additional Declarations other than Fruits and Vegetables".
- 2) Open the table for the specific product
- 3) Check whether the product is listed; if not, choose another table
- 4) Choose the origin, be as specific as possible

Definitions for 'Origin':

Origin	Means
Third countries	any country outside the European Union
Non-European countries	any country outside Europe
... countries, other than A	the requirement is not valid for country A. The requirement for country A is listed elsewhere
Countries recognized as being free from X	the <i>countries</i> that are mentioned are officially recognized by the EU ¹ as being free from X
Areas recognized as being free from X	the <i>areas</i> that are mentioned are officially recognized by the EU ¹ as being free from X
... countries where X is known to occur ...	This requirement depends on the pest status for organism X in the country of origin (to be determined by the country of origin). If pest X is absent, this declaration need not be present on the certificate at all. The requirement is shaded in yellow

¹ The EU officially recognizes a number of countries, or areas within a country, as free from a specific organism. These countries and areas are listed in the table. In those cases the additional declaration indicating the 'country free from ...' can only be used if the country is listed. The same goes for areas: The additional declaration indicating the 'area free from ...' can only be used if the area is listed **and** mentioned on the certificate

- 1) BOTH the full reference text (including the number) (see the column **Required additional declaration full text reference, as it should appear on the certificate**) and the text (see column **Required minimal additional declaration text (see in bold) as it should appear on the certificate**) shall be mentioned on the certificate.

An example:

in case 28a is chosen, the text should be: Consignment complies with Annex VII, point **28 a** of Commission Implementing Regulation (EU) 2019/2072, originate in a country free from *Liriomyza sativae* and *Amauromyza maculosa*

- 2) In the column 'Required additional declaration numbers (as it should appear on the certificate)' the different possible declarations are shown, divided by 'or'; one of these declarations should be mentioned on the certificate (e.g. 65 a **or** 65 b or 65 c or 65 d)
- 3) In some cases more than one additional declaration applies (e.g. 65 c; as well as 28 a **or** 28 b)
- 4) Example: Fruits of Citrus origin third country
The certificate should read:
Consignment complies with Annex VII, point **58 a** of Commission Implementing Regulation (EU) 2019/2072
or it should read:
Consignment complies with Annex VII, point **58 b** of Commission Implementing Regulation (EU) 2019/2072
Besides this, the certificate should *also* read:
Consignment complies with Annex VII, point **61 a** of Commission Implementing Regulation (EU) 2019/2072

or it should read:

Consignment complies with Annex VII, point **61 b** of Commission Implementing Regulation (EU) 2019/2072

In the documentary check the emphasis is on the position (**58 a** or **58 b**, **61 a** or **61 b**)

In case more than one declaration should be present, they can be listed as:

Consignment complies with Annex VII, point **59 a**, and point **61 a** of Commission Implementing Regulation (EU) 2019/2072

- 5) The full text of the content of the declaration is mentioned in the column tables '**Required minimal additional declaration full text (see in bold) as it should appear on the certificate**'
- 6) Emergency measures
For the product or group of products:
Fruits of *Citrus*, including *Citrus aurantium*

For products mentioned above an emergency measure, temporary measure, derogation (e.g. dispensation from an import ban), or other, has been put in place by the EU. In some of these regulations an additional declaration is needed, next to the general obligations. In these cases the additional declaration can be put either with reference to the position only (the same as in the general regulation) or in full writing. In the tables for each product the options are mentioned.

In case of full writing, the inspector, upon import, may demand a translation from the importer, due to control considerations. Certificate may be drawn up in any of the official languages of the EU. However, an inspector can not be expected to master all these languages. Therefore the inspector can request a translation from the importer, either on specific elements (e.g. the AD) or on the certificate as a whole.

10) [TABLES](#) with information provided by non-EU-countries on phytosanitary import requirements

11) The scientific names of products and organisms mentioned on the certificate should be written conform the official notation.

12) Besides the official English notation (EU) 2019/2072, the following notations are also accepted:

2019/.../CE

2019/.../EU.

13) All treatments must be communicated by letter to the EU and mentioned with treatment data on the certificate

14) Text in SMALL CAPS and underlined: this is a link to a specified table in the document; use Ctrl+click

15) Yellow marked text: in this version added or changed

16) Yellow and ~~double-striked-out~~ text: in this version striked out, in next version deleted

FRUITS AND VEGETABLES

FRUITS OF CITRUS, FORTUNELLA, MICROCITRUS, NARINGI, PONCIRUS, SWINGLEA, and THEIR HYBRIDS

How to use these pages and annexes

(EU) 2019/....

* **58 a, 59 a, 60 a, 61 a, 62 a, 66 a, 64 a, 65 a, 63 a**

Country free from (see **list by link**)

* **58 b, 59 b, 60 b, 61 b, 62 b, 66 b, 64 b, 65 b, 63 b**

PFA: pest free area mentioned on the certificate (see **list by link**)

* **58 c, 60 c**

PFPP: pest free place of production mentioned on the certificate

* **62 c** **PFPP:pest free place of production** and traceability code mentioned on the certificate

* **58 d** treatment and traceability code mentioned on the certificate (see **list by link**)

* **60 d, 61c** the traceability code mentioned on the certificate

* **61 d, 62 d, 66 d, 64 d, 65 d, 63 d**

treatment mentioned on the certificate (see **list by link**)

* **58 e** additional declaration: the fruits originate in a site of production subjected to appropriate treatments against *Xanthomonas citri* pv. *citri* and *Xanthomonas citri* pv. *aurantifolii*, carried out at the appropriate time *and* the traceability code mentioned on the certificate

* **60 e** additional declaration: the fruits originate in a site of production subjected to appropriate treatments against *Phyllosticta citricarpa* carried out at the appropriate time *and* the traceability code mentioned on the certificate

2016/715/EC

* **art 9** 'Fruit destined exclusively for industrial processing only into juice' mentioned on the certificate

Identification numbers of the containers and the unique numbers of the labels on the individual packages mentioned on the certificate

Table of information provided by non-EU-countries on phytosanitary import requirements: see page 2 point 12

The traceability code should be mentioned under Additional Declarations, or as part of description of the consignment.

ADDITIONAL DECLARATION
