

## **List of 8 niche projects of the Mangystau region**

### **1.«Production of electric motors in the Mangystau region».**

The main activity is the overhaul of electric motors. Planned production: production of electric motors with a capacity of 100-400 kW. Initial production volume per year: 1000-1500 units with a capacity of up to 100 kW. and 600 units. (traction ED) with a capacity of up to 375 kW. End product: energy-saving motors, high-safety motors, explosion-proof motors, high-temperature motors.

The preliminary cost of the project: **12.8 billion tenge**

### **2. «Construction of a desalination plant in the area Kendirli with a capacity of 50 thousand cubic meters»**

The Aktau branch of «KMG Engineering» LLP «KazNIPImunaigas» prepared a feasibility study (hereinafter-the feasibility study) for the construction of a desalination plant in the Kendirli district and was sent for consideration for state expertise (No. 01-03/12452 of 03.12.2020). The review period is 45 working days.

At present, the RSE «State expertise» has urgently taken measures to eliminate the comments and submitted them to the state expertise.

Receipt of the state expert opinion is scheduled for March this year.

Based on the results, the possibility of developing design and estimate documentation will be considered.

Preliminary cost of the project: **50 billion tenge.**

### **3. « Construction of a desalination plant in the district Kuryk with a capacity of 50 thousand cubic meters»**

According to the results of the first stage of the tender to determine a private partner using two-stage project procedures, the company Safbon Water Service Inc Shanghai was recognized as a bidder.

Currently, work is underway to develop a feasibility study of the project and transfer it to the state expertise.

Preliminary cost of the project: **50 billion tenge.**

### **4. «Construction of the railway station in Aktau».**

Mangystau region has a powerful transit, transport and logistics, infrastructure and service potential of international importance as a border region of the Republic of Kazakhstan, entering the multinational system of the Caspian region.

Geographical location of the branch market of the region – international: Mangystau region is bordered in the north-east by Atyrau and Aktobe regions,,in the west – by sea with the Russian Federation, Azerbaijan and Iran,on the South by Turkmenistan, to the East of Uzbekistan.

Two international transport corridors «TRACECA» and «North-South» pass through the territory of the region, connecting Eastern Europe with Central Asia and Northern Europe with the countries of the Persian Gulf.

Today, the only sea gate of the country passes through the export cargo not only of our country, but also of other countries that prefer this transport direction. Therefore, the development of a transport and logistics hub in the region is a priority direction.

Preliminary cost of the project: **8 billion tenge**

#### **5. «The construction of greenhouses»**

Today, the agricultural sector in the Mangystau region is a niche for business, since 85% of food and agricultural products are imported to the region from other regions and countries.

Preliminary cost of the project: **200 million tenge**

#### **6. «The cultivation of seafood».**

Today, the agricultural sector in Mangystau region is a niche for business, as 76% of food and agricultural products are imported to the region from other regions and countries. The advantage is a favorable geographical location.

Preliminary cost of the project: 1 billion tenge

#### **7. «Construction of a plant for the production of caustic soda by Topan Chemical Industries LLP»**

Today, work is underway to find a strategic partner for the project, as well as negotiations with potential partners.

Preliminary cost of the project: **28 billion tenge**
